**Alerting Abstract:** JP A

The catheter consists of a semiconductor photocatalyst arranged near the surface of a medical material which bonds a surface modification material when irradiated with UV rays of 400nm.

**ADVANTAGE** - Eliminates exfoliation. Prevents deterioration of lubricity even in presence of water.

**International Classification (Main):** A61L-029/00 **(Additional/Secondary):** A61L-033/00
